SUMMARY

A proactive and detail-oriented Business Analyst with experience in requirement gathering, BPMN/UML modeling, and wireframing. Passionate about understanding business needs and bridging technology solutions, I thrive in collaborative environments and aim to grow into a Middle-level Business Analyst within the next 2–3 years.

EXPERIENCE

THE ALAB DATA TECHNOLOGY

Jun 2025 – Present

Business Analyst Fresher

TravelAI - AI Travel Planning Chatbot System

- Analyzed travel planning workflows and user requirements for AI chatbot features
- Developed use cases, BPMN diagrams, and functional specifications for travel planning modules
- Defined business rules and conversational flows for AI travel planning features
- Collaborated with developers during implementation, testing, and AI feature optimization

Nam An Bird's Nest ERP System

- Gathered and analyzed business requirements from multiple departments
- Created BPMN, sequence diagrams, ERD, DFD for sales, inventory, and warehouse workflows
- Designed wireframes and interactive prototypes using Figma
- Worked with developers and testers to support UAT and issue clarification

Wonder Wood Manufacturing Management System

- Analyzed manufacturing workflows, material management, and operational processes
- Developed use cases, activity diagrams, and functional specifications for production modules
- Defined business rules and optimized system flows for manufacturing operations
- Coordinated with the development team during implementation and testing phases

Yummy Food Ordering & Management System

- Collected and translated user requirements into system features and business flows
- Created BRD, SRS documents, and user stories for ordering and payment functions
- Designed customer flow wireframes and interactive prototypes using Figma
- Collaborated with stakeholders and developers to refine feature logic and user experience

THE ALAB DATA TECHNOLOGY

Jan 2025 – May 2025

Business Analyst Intern

Fashion Inventory Management System (Mobile App) - The SHEA

- Collected and analyzed inventory requirements (shelf/warehouse) in Agile/Scrum
- Used Figma and Draw.io to design process flows, use cases, and interactive prototypes
- Wrote user stories and acceptance criteria for stock movement
- Aligned business needs with technical implementation via developer collaboration
